Tools & Technology: Jira, Confluence, Figma, Miro, Notion, GitHub, Postman, Python, REST APIs

WORK HISTORY

Product Manager | SIRRUS.AI – Mumbai

Oct 2025 – Present

- Own product strategy and roadmap for the Engagement CRM and Martech platform serving enterprise real-estate developers, driving lead management, customer journeys, workflow automation, and AI-powered engagement.
- Conducted 30+ stakeholder interviews and 8+ on-site customer immersions with CMOs, Sales Heads, Customer Success teams, and frontline CRM users across clients including Abil Group, Prasun Spaces, and Naman Group, translating customer insights into roadmap priorities and product decisions.
- Identified platform rigidity through customer discovery and led the transformation toward a configurable CRM architecture, defining Blueprint Management, Dynamic Lead Page Layouts, and Form Configuration capabilities that reduced customer onboarding timelines from 90 days to 15 days.
- Defined and launched an AI Voice Agent integrated with Exotel, owning prompt engineering, lead qualification workflows, conversation design, appointment booking journeys, and CRM automation across voice, WhatsApp, SMS, and email channels.
- Leveraged AI-powered prototyping tools to rapidly validate concepts and secure stakeholder buy-in,

reducing design iteration cycles and accelerating product approvals.

- Led end-to-end delivery of enterprise integrations including Zoho CRM, PickyAssist WhatsApp, and Servetel Cloud Telephony, collaborating with engineering teams on API requirements, testing, rollout, and customer-specific implementations.

Associate Product Manager 2 | Asteria Aerospace – Bangalore (Remote)

Jan 2025 – Oct 2025

- Defined product strategy and roadmap for drone operations workflows, collaborating closely with enterprise customers in construction, agriculture, and infrastructure sectors.
- Redesigned trial onboarding based on user interviews and funnel analysis, increasing trial-to-paid conversion by 12%.
- Simplified dashboard workflows through data-driven UX improvements, reducing average task completion time by 15%.
- Launched Drone Log Analysis, an AI-assisted telemetry analysis capability that automated anomaly detection and reduced dependence on third-party tools.
- Utilized AI prototyping tools to accelerate requirement validation, stakeholder alignment, and feature planning.

Senior Product Analyst | IPaySmart – Noida

Jan 2023 – Dec 2024

- Owned end-to-end delivery of Smart Revenue Recovery, a B2B utility payments product that improved on-time payments by 22% and reduced defaults by 17% within 3 months.
- Defined requirements and launched a Landlord Payments Portal that secured adoption from 4 enterprise clients post-launch.
- Built SQL and BI-powered dashboards to automate reconciliation workflows and improve payment accuracy.

Product Analyst | Smart Energy Water – Noida

Jul 2021 – Jan 2023

- Led requirements gathering and delivery for 6 enterprise utility projects, ensuring on-time execution and stakeholder alignment.
- Partnered with design, development, and QA teams to launch 5+ payment module enhancements, reducing customer support tickets by 20%.
- Developed a Prepaid Billing & Payment solution that helped close 4 enterprise deals within 6 months.

EDUCATION

B.Tech: Civil Engineering, May 2021

Punjab Engineering College – Chandigarh
